## Customer Reviews

I use the Faber series for all my students. The only book in the series I'm not wild about is the primer level, so whenever I have a bright enough/old enough student--even 7 years old, I'll start them right into the Piano Adventures Level 1 Accelerated version. Great stuff. Teaches very systematically and not too fast for all but the youngest students. Their arrangements are very musical. I've been teaching piano for over 20 years and have used various methods in the past, but switched to Faber about 5 years ago and love it!

great book! I liked it very much. The student who got it found it very challenging so I would say make very sure your student is going to be able to handle this; it moves more quickly than the regular piano adventures. Just saying...it truly is accelerated.

This book were recommended for my son by his piano teacher. My son thinks they're a little boring, but his teacher thinks they're perfect for review and mastering skills.

Piano teacher recommended. Great for mastering techniques and learning new skills. A lot of piano teachers and music schools recommend and have these.
