Agile Project Management: The PMI-ACP Certification Course
If you have followed a traditional project management approach and find yourself spending a lot of time fine tuning the design to accommodate changing requirements, you may want to consider a different approach. In this course, you will be introduced to agile project management, including the core values and principles outlined by the Agile Manifesto. This course is intended for project managers, program managers, or anyone who wants to efficiently participate in agile projects. It is aligned with the Agile Certified Practitioner exam objectives developed by the Project Management Institute® and Certified ScrumMaster learning objectives.
