SUMMARY: Buy this book and read it unless you have no interest in community, leadership, and business. In that case you're probably not even reading this blog. Leadership books. I've been getting tired of them ever since people started deciding "The Art of War" could be applied to businesses if you ignored all the war, killing, use of fire, and so forth in the book. Everyone talks about Leadership in business and in

the world, but as I don't see any improvement out there as the amount of lame Leadership books increase, so I assume most of these texts aren't that useful. At the same time, I'm very interested of issues in Leadership since I don't see nearly enough of it. I see bean-counting management, rock-star style poseurs, and exploitative jerks with a narrative. I don't see enough leadership in business, politics, media, or more - real, rallying, directing, powerful leadership. Tribal Leadership is the kind of book I've been waiting for. It not only explores issue of leadership, mostly (but not entirely) dealing with business, but issues of culture, organization, and community. In many ways its a book of applied sociology that happens to focus mostly on business. Based on research covering a decade, the book lays out a very clear thesis: 1. Humans naturally form tribes. 2.

I read a lot of business books and a lot of books on leadership - most of them have at least a few good ideas in them, but this is the first leadership book I've read that's driven me to look at organizations and the art of leadership in a completely different way. Another reviewer mentioned that it was liking having someone giving you glasses and suddenly being able to see in a completely different way - I felt that way as well. Even better, this isn't a book that just shares some opinions or ideas, with over 10 years of research across 24,000 people it's pretty clear the authors did a lot of hard research to figure out Tribal Leadership. What is Tribal Leadership - in a nutshell it's a completely new framework for how to look at leadership and creating high performing organizations. It's not about strategy and it's all about the culture and the evolution of the organization. It turns out there are 5 distinct stages of organizational culture that all build on one another. Stage 1 - Life Sucks...equivalent of a street gang mentality, not really a factor in most professional settings Stage 2 - My Life Sucks...Dilbert, the employees at Dunder Mifflin (The Office) or the employees at Initech Software (Office Space) are great, if a little over done examples of Stage 2 cultures. Stage 3 - I'm Great! (and you're not) - the lone warrior who is very competent and effective by themselves, but doesn't share well with others. Office politics, bad management practices and Stage 2 Cultures all come from Stage 3 managers. Stage 4 - We're Great - the language changes from I, Me to We and Us. It's all about the success of the team vs. individual accomplishments. The only way to really get to Stage 4 is to really 'own' stage 3.
