The Better World Shopping Guide #5: Every Dollar Makes A Difference
While we generally try to make our vote count every four years, few of us realize that our most immediate power to shape the world is being squandered on a daily basis. Every dollar we spend has the potential to create social and environmental change. In fact, it already has. The world that exists today is in large part a result of how our purchasing decisions have shaped it. The Better World Shopping Guide rates hundreds of products and services from A to F so you can quickly tell the "good guys" from the "bad guys" and ensure your money is not supporting corporations who make their decisions based solely on the bottom line. Drawing on decades of meticulous research, this completely revised and updated fifth edition will help you find out who actually "walks the talk" when it comes to: Environmental sustainability Human rights Community involvement Animal protection Social justice Small enough to fit in a back pocket or handbag, and organized in a user-friendly format, The Better World Shopping Guide will help you reward the companies who are doing good, penalize those involved in destructive activities, and change the world as you shop! Ellis Jones, PhD, is the award-winning, best-selling author of four previous editions of The Better World Shopping Guide and co-author of The Better World Handbook. A scholar of social responsibility, global citizenship, and everyday activism, Jones has dedicated himself to uncovering practical ways for people to make a difference in the world. He currently teaches at Holy Cross College.

I have to admit I’m feeling a little bit evil and trecherous for not giving such a great book and excellent concept a five-star review, but I will explain. I am a long-time vegetarian and long-time
environmentalist. I have been following Dr. Jones’ “vote with your wallet” concept for many, many years (more than I care to admit), and I firmly believe that our voice is most greatly amplified when we speak daily from our role as consumer. The GREAT thing about this book is that it is a concise, easy-to-carry, easy-to-consult-on-the-fly score card for most everything you might want to buy, from just about every company you can buy it from, and even from most of the places you’d be buying it. If you’re already a well-informed green shopper and you have some experience with the politics of responsible consumption, then this is, indeed, a five-star book. The downside to the book is that in order to make it a “pocket guide,” it contains very little background information or explanation for why a particular company received the score they did. If you’re new to the concept and find lots of your favorite products are getting Ds and Fs, then you are left almost on your own to find out why. (Of course, I’m all for doing your own research!) There are SOME explanations, but it’s just not possible to detail the myriad reasons for corporate irresponsibility in a 177-page pocket-sized book. There IS a web site for the book, but I don’t think it’s been updated for the second edition of the book, and it has very limited functionality. There is no search function, for example, and if there are details about specific company scores, I couldn’t find them. An example: I need some new pajamas.
