"American Caesar " is William Manchester’s superbly crafted and supremely well researched biography of Douglas MacArthur, one of the greatest but most controversial military leaders in American history. MacArthur has been praised for his brilliant strategic and tactical abilities during both world wars and accomplishments as Military Governor in post-World War II Japan, and criticized for his overweening egoism and inability to subordinate himself to the wishes of his civilian superiors. William Manchester writes with wit and candor as he chronicles MacArthur’s life from his earliest days to his death in 1964, at age 84. Manchester’s portrait of his subject is balanced and objective. We see MacArthur at his finest: capable and courageous on the battlefield during World War I, rising quickly to general officer rank as a result of his abilities; between the world wars, a progressive, reform-minded superintendent of the U.S. Military Academy, and later U.S. Army Chief of Staff; during World War II, a Medal of Honor winner, and the gifted but overly vainglorious commander of all Allied forces in the South Pacific, who achieved brilliant military successes with his "island-hopping" strategy; and later, as Military Governor of Japan, displaying a surprising magnanimity toward the conquered Japanese by introducing American-style democracy and liberal reforms. We also see him at his worst: pompous and vain, always seeking personal glory, often at
his subordinates’ expense; vindictive toward his subordinates when they disagreed with him; and
finally, during the Korean War, the Supreme Commander whose hubris led him to openly defy his
commander-in-chief, resulting in his relief by President Harry Truman.
